The world moves. Your building security should move with it

ASSA ABLOY
Opening Solutions

Incedo™ Business. Moving people. Together.

Experience a safer
and more open world

Introducing Incedo™ Business

Moving people. Together.

The way we move keeps changing — as does the way we use today's smarter buildings. People demand different access times and entry points.

Security requirements change day to day, locking down some areas while opening others. Ours is an age of continuous, evolving restlessness. Access control makes this movement of people possible, so your systems must move with it.

As an organisation, you need a single, all-encompassing platform to deliver connectivity, convenience and simplicity.

Incedo Business
The access control you demand,
the flexibility you need

This is where Incedo comes in: an ecosystem combining ASSA ABLOY's world-leading range of access hardware and security solutions with flexible software and multiple management options. Incedo user interfaces are friendly, flexible, and easily updated to meet the changing needs of your business.

Incedo delivers the integration and connectivity your business demands, providing secure access points and advanced identification technology. It makes life easier and work more efficient for everyone, from installers to end users.

Incedo Business works for any building, leaving you free to focus on growing your business. It makes sure your employees, customers and goods are where they need to be.

- Incedo gives you superior protection and convenience, future-proofed to grow and move with your business

- Protect your employees, visitors and suppliers with absolute, real-time access control over every entry point to the building

- Enjoy a simple, intuitive interface to quickly issue or revoke access permissions

- Receive reports of system events: entries, exits, lockdowns and more

- Scale the system as your business grows, adding new entry points, buildings and software features

· *Manage everything on your smart device. For Lite and Cloud, you don't even need a dedicated computer

· *Control access remotely, no matter where you are. Need to open a door for an urgent delivery? No problem. Travelling when you need to lock down a building immediately. Done

· Staff open all the doors they need with a single smart credential, such as their own mobile phone

· This intuitive system is simple and comfortable to use. It offers the security your employees need to concentrate on business

· In case of forgotten credentials, a new key can be programmed instantly, from anywhere

· *There are many opportunities to integrate with third-party hardware, for even more flexibility

· Replacing lost or stolen credentials is easy. Just delete them from the system and create a new one

· Your employees move swiftly and securely through the building. Whether in an office, school or hospital, they feel safe knowing their workplace is protected

· Flexible upgrades and total scalability of management options and hardware slash the total cost of ownership

Incedo offers the flexibility to scale your system up and down anytime

At low cost and with minimum effort

Select from a wide range of Incedo-enabled security and access control hardware

Flexibility is key when you configure your Incedo system

Incedo is a completely flexible, modular platform. Simply select the most appropriate devices for your access points, from a growing range of Incedo-enabled hardware. Add the most suitable management system for your needs. Then manage it all seamlessly with your Incedo Graphic User Interface.

If your business grows or its security needs change, Incedo adapts with you. You have total flexibility to choose different software or hardware to meet your new requirements.

There is no need to retrain employees or replace software. Incedo gives you the flexibility to upgrade to the latest building technologies and solutions, whenever you choose.
Controllers

The heart of your installation connects readers, wireless door locks and other devices to the central Incedo system. The Controllers keep everything and everyone moving with maximum efficiency.

Readers

Choose from a variety of Incedo-enabled wired and battery-powered readers. You can mix and match readers to meet the exact requirements of your business and building.

At launch you can already select the most suitable option from a growing range of Incedo-enabled security and access control hardware

The examples shown are the availble controllers and wired readers, and below the range of wireless door locks which can be operated with either card or mobile key

Programmers

Keep everyone's credentials up to date with a range of convenient programmers and updaters. With the correct access rights, everyone keeps moving easily and securely.

Credentials

Our range of convenient credentials have intelligence and security built-in. Cards and tokens offer broad RFID compatibility. Encrypted mobile keys enable users to open doors with their smartphone.

With Incedo, you choose the devices you want from ASSA ABLOY's world-leading portfolio of access hardware and security solutions. All new ASSA ABLOY electronic and electro-mechanical devices will be Incedo-enabled from launch; Incedo-enabled hardware from carefully chosen third parties will be available.

The modular platform based Incedo ecosystem will evolve and grow — with new hardware, user interfaces and tailored software features. With a totally flexible choice from a growing portfolio of products and applications, you have peace of mind today and are equipped to meet the security challenges of tomorrow.

You can upgrade or downgrade your hardware seamlessly and anytime

Select your system management; Lite, Plus or Cloud

3 options, 1 goal: Making your life easier with seamless upgrades or downgrades anytime

Incedo Business provides the user-friendly interface for managing your access control platform. You have a choice of system management options — Lite, Plus and Cloud — to administer Incedo-enabled hardware in a way that best suits your business' needs.

You can switch between Lite, Plus and Cloud system management whenever you choose. With Incedo, total flexibility is guaranteed — today and in the future.

Launch dates for Plus and Cloud versions vary by region

Incedo Lite
The quickest and simplest way to revolutionise how you monitor and manage access control on site.

Key benefits:
· A feature-rich, single online platform solution
· Embedded within your system
· No need for a dedicated PC
· Easy to set up, quick to upgrade
· Control up to 32 doors
· Access for up to 1,000 people
· Online readers
· Auto ID of hardware

When your business grows, your security and control needs grow, too. Upgrade your Incedo system to Plus or Cloud to enjoy more features and benefits.
Incedo Plus
Step up from Lite with enhanced access control features to manage multiple sites and integrate third-party hardware and smart building solutions.

Incedo Cloud
Step up from Plus to control all sites via the cloud and access your system 24/7 from any smart device.

You can change your system management seamlessly anytime

Thinking about the future?
Incedo will move with you, providing upgrades of system software and hardware, based on your needs

Scalable at any time

A future-proofed investment which gives you total flexibility

CREDENTIALS

The security challenges of our world never stand still – but connecting software and hardware within one future-proof platform makes it easier to meet them.

Incedo is built to evolve and grow, but you can leverage your investment from day one. Incedo offers completely flexible migration within the ecosystem. Both software and hardware are fully scalable, to meet your needs today and in the future. Incedo is fully future-proofed.

Your Incedo system has unlimited flexibility: scale up or down, upgrade or add new devices and software whenever you choose. You are in total control.

How could Incedo move with you?
Some examples:
· Do you want to change how you manage Incedo?
  If you want to upgrade from Incedo Lite to a cloud-based admin for managing multiple sites, just upgrade to Incedo Cloud without any hassle. All system management options are interchangeable, with minimal effort and cost. All your existing data from Lite migrates seamlessly.

· Do you want to change the credentials you issue to users or offer intelligent key credentials? You can deploy Incedo smart keys straight away, without any hassle. These keys operate digital locking cylinders within the Incedo ecosystem. They also house the technology to unlock doors via wired or wireless readers.

· Do you want to add new software functions tailored to your sector?
  Incedo Business software powers security for any business, and works for small and large premises. The Incedo ecosystem will also grow by adding smart user interfaces with solutions optimised for small and medium sized hotels; education; healthcare facilities; and more. When these solutions launch, you can seamlessly migrate.

Incedo. Let's move. Together.

The ASSA ABLOY Group is the global leader
in access solutions. Every day, we help billions
of people experience a more open world.

ASSA ABLOY Opening Solutions leads
