What would life be without details?

How would it be without handles on doors and drawers? Or without order in the kitchen drawers? Life would be a bit more complicated for sure. But besides having a purely practical function, the details complement the rest of the interior and showcase the room designer's personality and nature.

At Beslag Design, we keep up with the latest trends and classics that never go out of fashion. The details that withstand life. That soften or formalise, that stick out or blend in. In our website, you find handles, lighting, legs, storage, knobs and fittings. It's all in the details, really.
